

the new
Platinum

Sanding system in highest precision

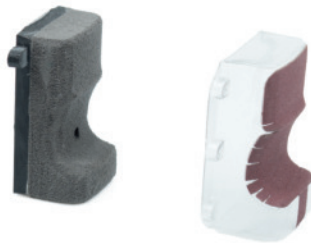

The New **Platinum** Product line from Arminius Tooling was specially designed for the high precision applications. This is a perfect match that will deliver a very tight tolerance within the speed required to meet the demands of the industry today.

Due to our solid and precise construction of the base disc, the Platinum Line offers the best accuracy with no run out. There are NO tools required to change abrasives, in turn keeps your change out time to a minimum and the tool in production.

The **Platinum** line creates a perfect sanding surface, which leads ARMINIUS into a new era for the profile sanding applications.

- **No tools needed to change Abrasives**
- **Positive locking systems to give added accuracy**
- **Faster feed rates = More Efficient Cycle Speeds**
- **Will run at 2000 RPM**
- **Precision Tooling = Quality of finish**
